

REGULATORY FRAMEWORK FOR E-SABONG OFF-COCKPIT BETTING STATION (OCBS)

Increasing foot traffic in casinos and our various gaming stations has proven itself to be a very effective marketing tool in bolstering our revenue-generating capacity. Establishing activities other than what is currently offered thereat, encourages people to visit and explore our gaming sites, thereby creating potential clients.

Also, as we are seeing lesser capacities being allowed in our stations, not only because of the pandemic, but also because of a portion of our clients now opting to play using their mobile devices via our online games, more and more spaces are now being freed up at the stations. Allowing these spaces to be used by other gaming operators will provide our site operators additional income stream to augment their income and help them recover faster from the economic hardships they encountered during the pandemic.

Filipinos are generally conservative when it comes to their business dealings. This is more evident on how they perceive the safety of using mobile and cashless means in their day-to-day transactions. Connectivity is also a major concern. The “trust issues” and the reliability of the internet services add to the discomfort of gaming patrons with digital transactions. They prefer to play inside a gaming facility where they can easily cash-in, bet and withdraw their money. This gives the assurance that they can engage physically with in-house representatives to address their concerns promptly.

In view of the foregoing, the following are laid down as the Regulatory Framework for E-Sabong Off-Cockpit Betting Stations (OCBS).

I. DEFINITIONS

a. Off-Cockpit Betting Station
